THE MOBILITY SERVICES YOU WANT
ENTERPRISE MOBILITY MANAGEMENT

A ONE-STOP SHOP FOR ALL SERVICES

Nowadays, just about every company is addressing the issue of Enterprise Mobility. Because networked cooperation, constant sharing of information and data and the ability to take immediate decisions is becoming increasingly important for commercial success. So the question is no longer whether to implement mobility, but how – with mobility now encompassing much more than just Mobile Device Management. It now also includes management of apps and content, plus security and other functions such as Telecom Expense Management.
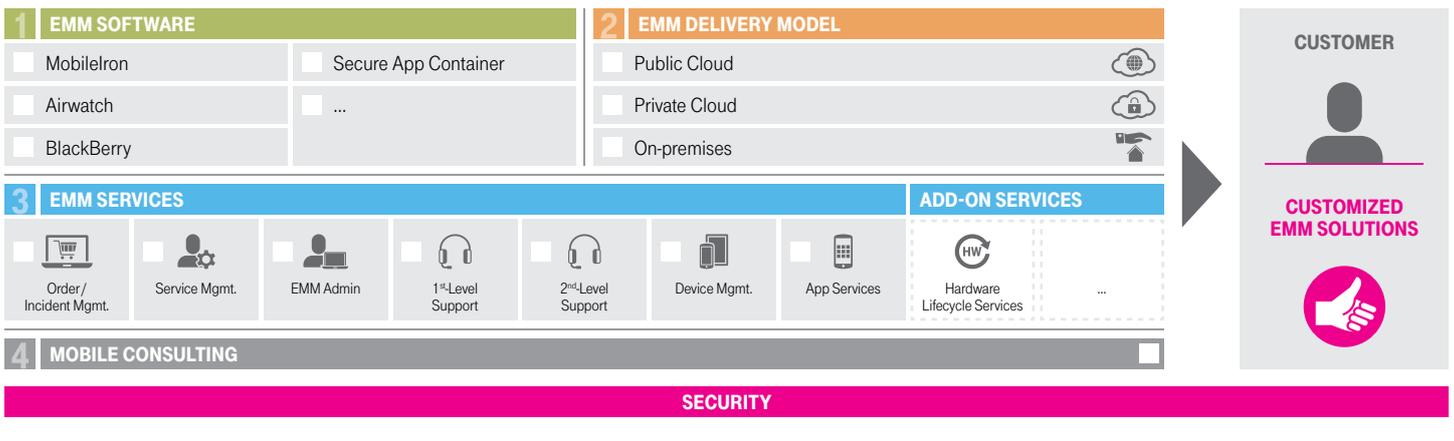

The market for software, infrastructure and services is vast and characterized by a wide range of stand-alone solutions. T-Systems Enterprise Mobility Management puts an end to this complexity because it brings together the full range of capabilities in a modular, interlocking set of technologies, infrastructures, processes and tools. It also answers the question of where to draw the line between insourcing and outsourcing to T-Systems.

Rediscover mobility with T-Systems – with a broad range of software, delivery models, core and extended services. Simply choose the solution that's the best fit for you.

SECURITY

BASED ON YOUR NEEDS.
Your individual needs form the basis for a T-Systems Enterprise Mobility Management (EMM) solution. Based on existing services, your corporate strategy and the respective needs of the various departments involved, we identify the most suitable components of Enterprise Mobility Management for you during the course of an in-depth consultation process. We are happy to help you decide which provider and services are the best fit for your requirements.

SOFTWARE, DELIVERY AND SERVICES.
You can choose Enterprise Mobility Management from one of the market-leading software houses based on the range of functions you need. T-Systems provides these services in various operating models – from public to private cloud ensuring maximum security and also as an on-premise solution. You have a choice regarding the relevant service and the level of management you require. The range of available modules means that you can choose any level of management, from self-service (where you do everything) to fully managed services (we do everything for you). For example, the EMM services available cover Incident Management, First- or Second-Level Support, Service Management, and EMM Administration. Other services include Device Management, or Application Management with the support of App Services.

GET STARTED WITH A PROOF OF CONCEPT.
Conduct a test and get started with T-Systems Enterprise Mobility Management simply with a proof of concept for the MobileIron solution for 10 users over a period of 8 weeks.

Scope of services: Devices (provided by customer), data (provided by customer), support provided by T-Systems EMM experts, licenses (provided by T-Systems).

YOUR BENEFITS WITH T-SYSTEMS

- **Multi-vendor solutions:** You use solutions from technology leaders and can adapt more rapidly to innovation cycles.
- **Different delivery models:** You choose the optimum delivery method for you, whether from the public cloud, private cloud, or on-premises
- **Modular, flexible sourcing:** You decide which functions you want provided as Self-Service or Fully Managed Service.
- **Flexible device ownership models:** From Bring Your Own Device (BYOD), Corporate Owned, Personally Enabled (COPE) and Corporate Owned, Business Only (COBO) to Extended Enterprise in a model that allows you to give business partners' devices secure access to parts of your backend via managed containers. The choice is yours.
- **Standardization:** You benefit from seamlessly standardized services, processes, tools and payment models with scaling options for an unlimited number of devices.
- **Market-oriented prices:** Opex rather than Capex, no investment or fixed costs, and a cost per user and month means you not only reduce costs, but can also optimize your planning.
- **Security Made in Germany:** Security has top priority at Deutsche Telekom. The servers for our cloud products – regardless whether public or private cloud – are located in highly secure Telekom data centers on German soil. You benefit from Telekom's extremely high security standards and from Germany's strict Data Protection Act.
