

## Managed Service Provider for SAP on Azure

Design, Transform and Operate SAP on Azure

T-Systems and Microsoft are helping organizations achieve fast and cost effective deployments to SAP on Azure. T-Systems help organizations to design, transform and can also provide managed services operations for SAP on Azure

### Introducing T-Systems' Cloudifier process for SAP on Azure

T-Systems offers a standardized SAP transformation approach to Azure with the Cloudifier process. We provide a clear and documented roadmap for design, consultation, planning, transformation, implementation and operations for SAP on Azure.

### How Does a Customer Benefit from the T-Systems 'Cloudifier' Process?

1. End-to-End design – Fast and Objective
2. Transformation with clear plans and proper execution
3. Secure operations

#### #1 End-to-End Design – Fast and Objective

- Customized design that suits your business needs
- SAP applications and Azure infrastructure advisory
- SAP transformation roadmap
- Keep project within budget

#### #2 Transformation – Clear Plans for Proper Execution

- Clear process defined
- Migration existing SAP landscape or migration to HANA
- Transform to S/4 HANA
- Analytics

#### #3 Secure Operations

- Receive support from T-Systems
- Operations and service delivery management
- SAP Basic operations, firewalls, OS and network operations

**Learn why and how customers with over a 1M SAPs and over 25TB of HANA storage chose T-Systems and Microsoft to deploy their mission critical SAP HANA in a hybrid cloud format. This includes integrating an existing SAP landscape to Azure.**

# The T-Systems Cloudifier Process Enable Customers to Take Full Advantage of SAP on Microsoft Azure

## SAP on Azure deployment scenarios:

- Development and test
- Training environments
- Production environments
- Disaster recovery

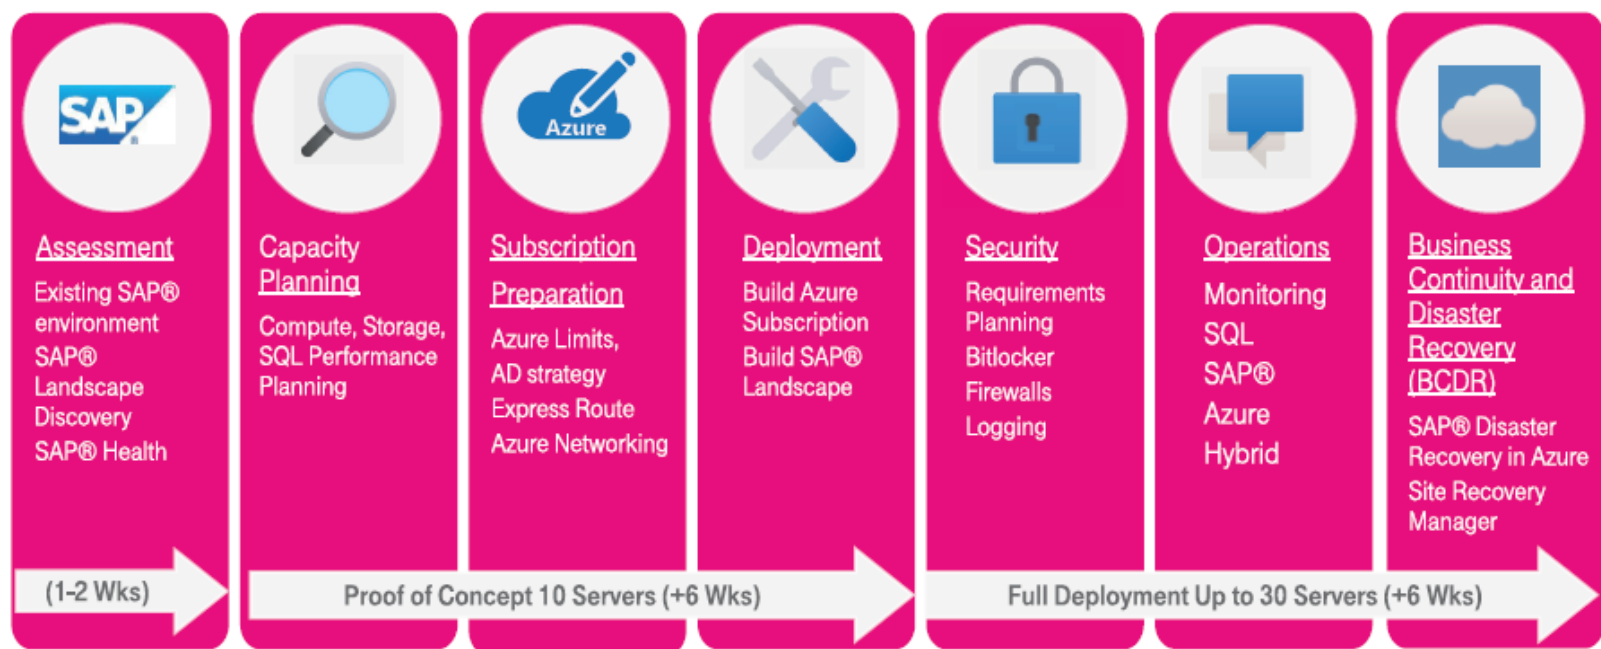

## T-Systems Engagement Overview

- Delivery of your SAP on Azure solution ranges over a number of weeks

The SAP on Azure infrastructure from T-Systems helps organizations to deploy and operate multiple SAP landscapes in Azure.

### An offer to get you started

- We provide personalized T-Systems SAP on Azure workshops
- We conduct a detailed study of your current systems and architecture
- We recommend either a New Deployment or Migration Strategy

## Tangible Benefits / Desired Outcomes

- Clear and well defined solution developed according to business needs
- Minimal disruption while transforming SAP workloads to Azure
- Seize business opportunities while data is kept secure

## Why T-Systems?

T-Systems is a global managed service provider and systems integrator for Microsoft and SAP. We possess over 20 years of experience in deploying SAP solutions. Our Cloudifier process help customers to design, transform and operate in a structured and reliable way on premise, private and/or public cloud.
