

SPEED FOR NEED

DYNAMIC SERVICES FOR SAP® SOLUTIONS

TRANSFORMATION MEANS FLEXIBILIZATION

Digitization is nothing new to SAP user organizations. It is, however, gaining momentum and urgency. Successful digital transformation requires enterprises to change their businesses models – either incrementally or radically. They need to innovate – for instance by leveraging big-data analytics and benchmarking to obtain actionable knowledge in real time, by evolving data-driven business models, or harnessing digitization to create new revenue streams.

The main challenge lies in the fact that complex, inflexible systems environments cannot deliver the agility and speed demanded by today's business climate. Closing that gap is not easy.

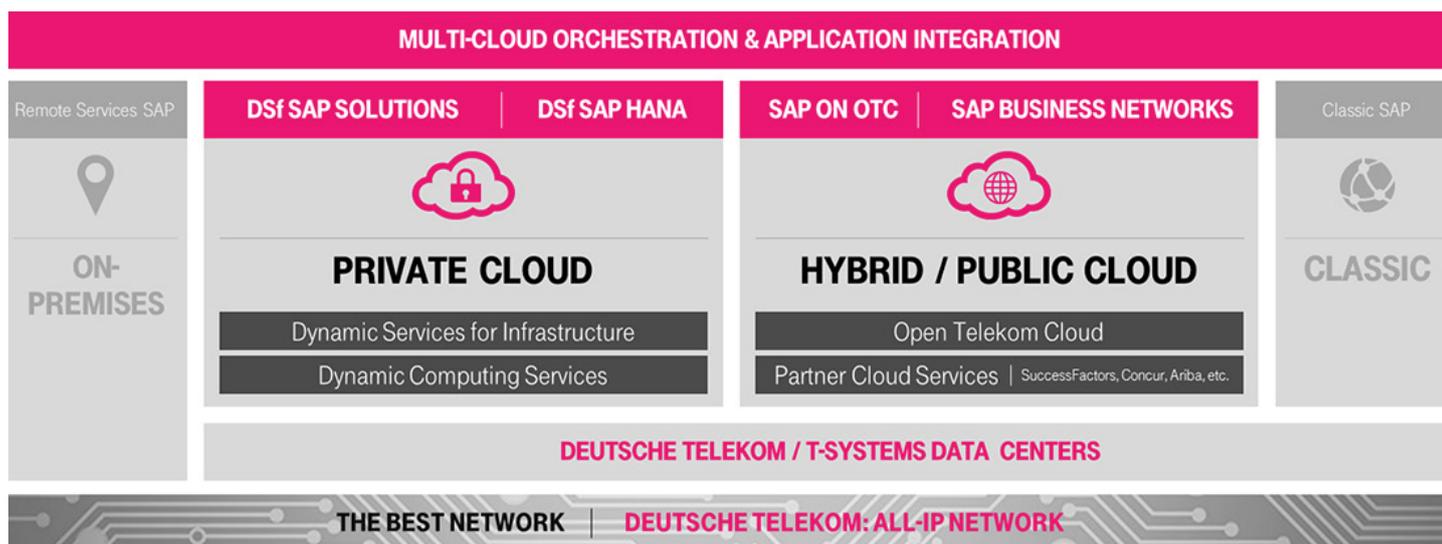

The market expects and requires enterprises to innovate faster. T-Systems can help – with **Dynamic Services for SAP® Solutions**. This offering unlocks the full potential of SAP solutions within a cutting-edge, hybrid IT environment. One that can be easily aligned with new requirements, enables the enhancement of existing processes, and is fully scalable.

SPEED FOR NEED

- **Choose the solution that suits your specific needs:**
Flexible platforms, operating models and data storage models that meet your business imperatives
- **Become a real-time, digital enterprise:**
with dynamic SAP HANA® test and production environments delivered from a cloud
- **Never pay for more than you use:**
Pay-as-you-go pricing frees up resources for innovation
- **Reduce and manage complexity:**
Make SAP roadmap decisions that are right for your enterprise, with help from an experienced partner

Set course for the digital world with T-Systems – with platforms, resources, and services that can be tailored to your needs. As your partner, we share responsibility for your successful business transformation.

MULTI-CLOUD ORCHESTRATION AND APPLICATION INTEGRATION FOR OPERATING SAP SOLUTIONS AND SAP HANA®

T-SYSTEMS UPGRADES AND OPERATES YOUR SAP SERVICES FROM END TO END

Take the opportunity to transform your SAP solutions with T-Systems. Develop a complete, no-risk roadmap with clearly defined milestones.

To help you transform your SAP landscape, T-Systems provides well-structured, coherent packages of consulting, planning, implementation and operation services. Our offering's modular design means that customer-specific end-to-end solutions can be established quickly. These span the entire journey – from consulting and pre-migration preparations, to the migration itself, to implementation of SAP S/4HANA, to SAP optimization.

All packages are geared towards typical customer scenarios and related system landscapes and dimensions. They come with fixed prices in a variety of sizes. This gives you total visibility into the costs, benefits, and project duration.

KEY BENEFITS

- **Flexibility and scalability** – in terms of infrastructure, performance, and operating models
- **30% lower operating costs** due partly to automated platform operations, pay-as-you-go pricing, and intelligent data storage
- **Implement innovations** without risk, by replacing capex with opex
- **Tried and trusted quality management** for secure, stable and high-availability operations for SAP applications
- **Data protection** in line with German legislation
- **Access to specialists** for SAP HANA, data architecture and big data
- **Robust governance** with proven collaboration models and transparent reporting, including provider management
