Best in class drone detection:

DRONE@ONSITE

Critical infrastructures and urban areas are more and more vulnerable to drone attacks with unforeseeable consequences.

Our offer:

A comprehensive product and service package for drone detection, including maintenance. Whether long-term assignment at your location or short-term to secure a specific event: We offer the solution from a single source!

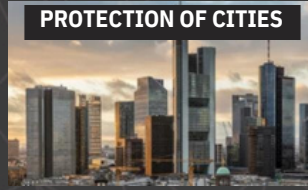

PROTECTION OF PEOPLE

PROTECTION OF INFRASTRUCTURE

PROTECTION OF CITIES

- Early detection of improperly used drones passive, data protection compliant, approval-free
- Precise detection in challenging environmental conditions Up-to-date, expandable signature database
- Ability to transfer reports to third party systems

FAST INSTALLATION

HIGH EFFICIENCY

EXACT GEO LOCATION

Our solution

- Data storage on local servers or security-certified clouds hosted in Germany
- Connection to existing building management systems and integration into control center systems
- Coverage area of up to 9 km² with six sensors
- Compliant with all applicable laws and regulations
- Freely expandable monitoring area
- Precise localization to detect the pilot
- No false alarms
- Immune to Spoofing & GPS-deception
- Integration of additional sensors and effectors possible

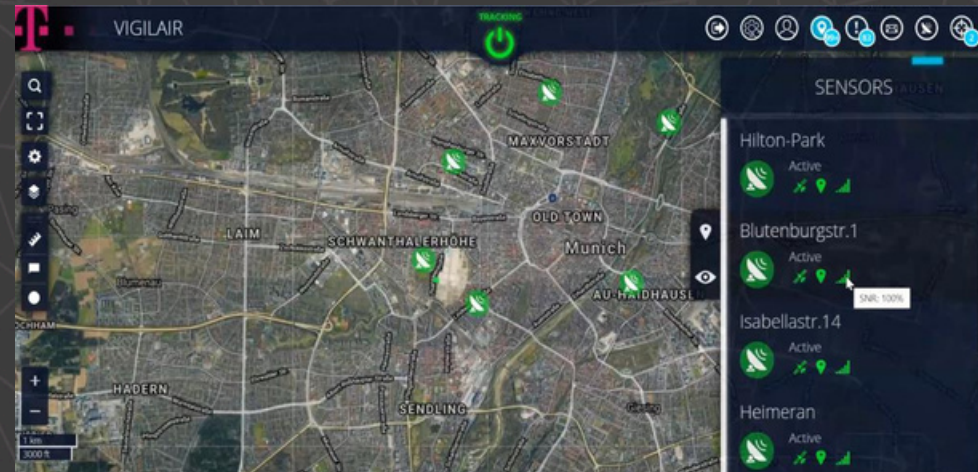

Our system provides reliable, early drone and pilot detection in urban environments. Our solution is proven to work in the most challenging environmental conditions and uses passive RF-based technology based on the TDOA method.

We are your contractual partner: Our technicians take care of the installation, instruction and support, as well as service and maintenance for you. We implement your solution in such a way that optimal protection of your property is guaranteed.

Best solution on the market

Absolutely reliable RF technology with maximum precision, long ranges, early detection of commercial and DIY drones without any limit, individually adaptable, scalable over a large area, performance tested and proven internally and externally.

In addition, we also offer drone@onsite for rent, for specific events or as a multi-tenant solution. We are happy to advise you on this!
