

T-Cloud for Healthcare

Cloud Hosting (IaaS / PaaS)

T-Cloud is a next-generation multi-cloud platform.

It's a Private Cloud with hybrid flexibility, giving you the freedom to scale like the public cloud, the control of on-premises infrastructure, and the financial predictability of a transparent Opex model.

Managed Services + **Infrastructure** = **Savings, Agility, and Control**

Whether your workloads run on public, private, or hybrid environments, T-Systems ensures seamless, high-quality operations across all platforms.

Private Cloud	Public Cloud	Hybrid & Multi-Cloud
A dedicated, hybrid-ready environment built for control, compliance, and long-term cost optimization.	Harness the scalability and reach of AWS, Azure, and Google; integrated, secure, and managed under one governance model.	Seamless orchestration across public and private environments, enabling flexibility without compromising data protection or performance.

Key Capabilities

- **Cost Optimization:** Transparent billing with zero hidden charges.
- **Infrastructure Optimization:** AI-driven observability and continuous managed operations.
- **Business Continuity:** Twin-core data centers in Texas provide complete redundancy and resilience.
- **Backup and Disaster Recovery:** A three-two-one backup strategy powered by NetApp SnapMirror and SnapShot ensures immutable data protection.
- **Security and Compliance:** European-grade security, and compliance with HIPAA, PCI-DSS, and FISMA.

How it works?

1 Assess Evaluate infrastructure and identify cloud-ready workloads.

2 Migrate Execute seamless, risk-free transitions to AWS, Azure, or Google Cloud.

3 Manage Automate, secure, and scale operations without vendor lock-in.

The Numbers Behind T-Cloud

0

Zero-cost migrations, no initial setup or onboarding charges

15-20%

No more 15–20% in hidden ingress and egress fees.

-30%

Up to 30% savings comparing to current VMware on-prem platform

24/7

24/7 managed operations backed by Deutsche Telekom's global reliability

100

100% European-grade security and compliance across all environments.

About T-Systems

T-Systems North America is part of Deutsche Telekom, the same global family as T-Mobile. We are technology geeks at heart, passionate about solving IT complexity so you don't have to.

We are the geeks who make companies save money. Let us manage the IT complexity, so you can focus on what matters: running your business

WHY US?

- Backed by Deutsche Telekom's global infrastructure and reliability
- Built for healthcare, certified to host leading EHR platforms
- Seamless multi-cloud integration with AWS, Azure, Google Cloud, and NetApp
