

T-Systems

Solution for Healthcare

The innovative end-to-end IS-H successor solution with a fully integrated migration path for hospitals, clinics, and other healthcare facilities. It is based on SAP S/4HANA-technology and offers fully integrated patient management, efficient service billing, and open interfaces to your subsystems.

The creation of T-Systems Solution for Healthcare:

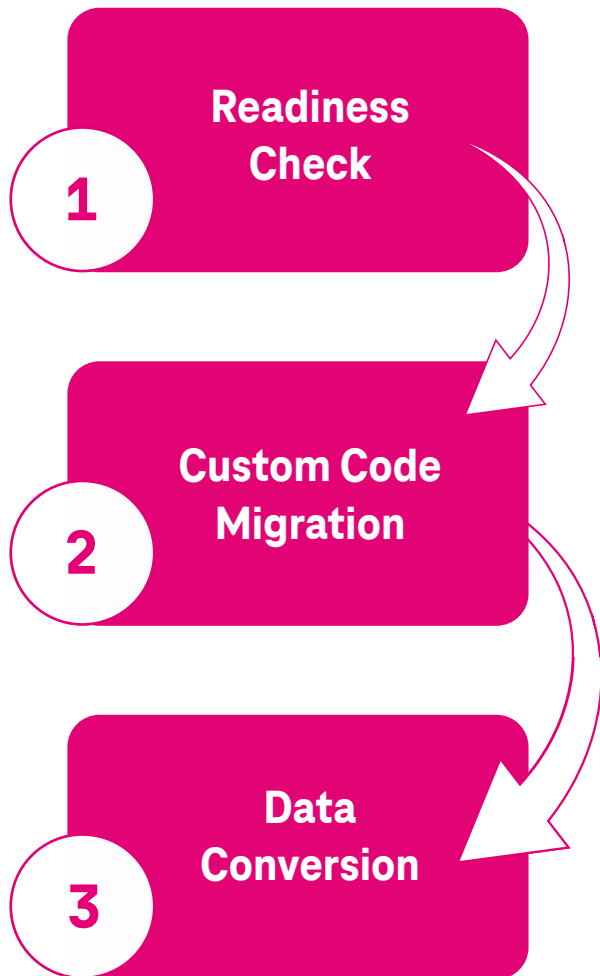

T-Systems Austria has been developing the country versions for Austria and Switzerland on behalf of SAP for over 25 years. The discontinuation of IS-H by SAP in 2027 (extended until 2030) prompted T-Systems to draw on its many years of expertise to use the basis of IS-H and offer a modernized billing solution. However, necessary proven adjustments are being made to create a future-proof product. In close cooperation with ATSP as its conversion partner, T-Systems is now developing the T-Systems Solution for Healthcare (TSHC), which can seamlessly take over your proven IS-H system in its entirety.

Your benefits at a glance

- Easy transition thanks to a familiar interface and transfer of existing data
- End-to-end digitization and automation of patient management and service billing
- Future-proof solution based on state-of-the-art SAP S/4HANA technology
- Optimized treatment processes and cost transparency through integrated functions
- High security and compliance – thanks to certified SAP technology
- KIS-neutral

Zero reconceptualization.
Fully automated conversion.
Resource-efficient. Built for an **innovative future.**

How the transition works:
