

REHA.Complete

THE DIGITAL BACKBONE FOR MODERN REHABILITATION FACILITIES

Rehabilitation facilities play a critical role in the healthcare continuum - bridging the transition from acute treatment to long-term recovery. Yet, many rehab organizations still rely on fragmented systems, manual coordination, and disconnected documentation, creating inefficiencies that impact both staff productivity and patient outcomes.

REHA.Complete is a specialized digital solution designed specifically for rehabilitation clinics and recovery centers. It enables structured, end-to-end management of clinical and administrative workflows - from admission and therapy planning to documentation, billing, and discharge - within one integrated platform.

KEY CAPABILITIES OF THE PLATFORM

01

End-to-end patient journey management

Manage the complete rehabilitation journey with a unified system covering admissions, therapy planning, medical documentation, discharge, and follow-up readiness.

02

Integrated therapy & resource planning

REHA.Complete enables structured planning of therapy sessions, staff schedules, and resource allocation, ensuring optimal utilization of capacity while maintaining patient-centered treatment plans.

03

Centralized documentation for medical and administrative processes

Replace fragmented paper-based workflows with standardized digital documentation. Improve transparency, reduce errors, and support compliance with consistent and complete patient records.

04

Optimized billing, reporting & reimbursement support

With integrated administrative functions and financial transparency, REHA.Complete and its partners help rehab facilities, improve operational control and strengthen reimbursement processes, reducing revenue leakage caused by missing documentation or inefficiencies.

05

Web-based and flexible deployment

REHA.Complete supports modern IT requirements with a scalable architecture and browser-based usability, enabling secure access across teams while reducing infrastructure overhead.

WHAT MAKES REHA.Complete DIFFERENT

Tailored for long-term, multi-disciplinary care and progress tracking

Provides each user – from physicians to therapists and nursing teams - a structured, relevant overview

Reduces administrative burden, allowing staff more time to focus on patient recovery

VALUE FOR YOUR FACILITY

For management

- Better capacity utilization and planning transparency
- Standardized workflows across departments
- Reduced operational complexity and system fragmentation

For medical and therapy teams

- Faster access to patient information and treatment history
- Simplified therapy planning and progress documentation
- Stronger collaboration across multidisciplinary teams

For administration & finance teams

- Improved documentation quality for billing and reimbursement
- Reduced manual effort in reporting and data handling
- Increased process consistency and audit readiness

A solution designed for rehabilitation - built for outcomes

REHA.Complete provides the digital foundation to run rehabilitation facilities with greater efficiency, clinical transparency, and operational control. Interested to see how this solution can deliver measurable outcomes for your facility?
