

Managed and Professional Services

Take control of your enterprise systems

Healthcare companies face growing pressure to modernize core enterprise systems such as SAP, ServiceNow, and networking platforms while controlling costs and maintaining compliance. Vendors are increasingly imposing migration deadlines and high-cost updates, creating uncertainty for executives who need flexibility and financial predictability.

T-Systems provides complete managed and professional services across SAP, ServiceNow, Security, and Networking. We manage cloud environments on AWS, Azure, and Google Cloud, combining infrastructure expertise with deep enterprise-application knowledge.

Stay compliant and optimized

Sizing

Know exactly what you need — licenses, users, cloud, and system capacity.

Strategy

Choose the smartest financial and operational path — maximize ROI, minimize risk.

Negotiation

Turn insights into power — secure the best deals and contract terms

UNDERSTAND YOUR OPTIONS AND OPTIMIZE USER LICENSING COSTS

What we do

- **SAP Services:** We assess your SAP landscape to identify unused or redundant licenses, optimize support costs, and prepare your systems for S/4HANA or any future route you choose. You decide the pace, staying on-prem, adopting hybrid models, or preparing for RISE readiness.
- **ServiceNow Management:** We modernize workflows, automate service delivery, and ensure seamless integration across platforms.
- **Security and Compliance:** Built-in protection with zero-trust architecture, continuous monitoring, and adherence to healthcare regulations including HIPAA and GDPR.
- **Networking and Cloud Management:** We operate your enterprise connectivity across AWS, Azure, and GCP, ensuring unified performance and visibility.

How we do it

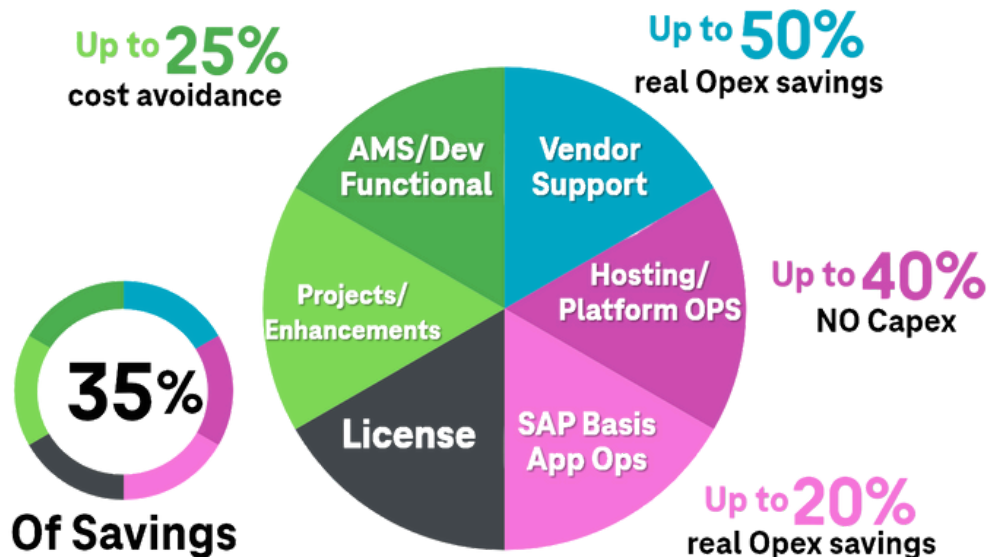

Use Case: Starting Managed Services for SAP

8-12 WEEKS PROJECT DURATION

What it means for your business

SAP Overall Spend and Potential Savings

We guide you through every stage — from assessment to negotiation — ensuring your enterprise systems stay compliant, optimized, and financially efficient.
