Get ready, start & go Managed Cloud Services for AWS

Lighten your IT department's workload, enable application development.

Has your company been wanting to start using Amazon Web Services for ages? Now is the time! Use AWS resources and T-Systems' Managed Cloud Services "Foundation" for three months and we will provide you with onboarding support via web conference.

01 **AWS resources and Managed Cloud Services "Foundation": credit up to 2000 € monthly, for the first 3 months!**

- Provision of AWS resources
- Operation of IT as "Managed Service Foundation" by T-Systems. This includes protection of your AWS account with a security and compliance framework implemented by T-Systems' AWS experts.

02 **Including AWS onboarding**

T-Systems experts install the AWS account together with you in line with your company requirements to get you up and running quickly.

Information and conditions

The above conditions for a test phase of three months only apply if you decide by December 31, 2022 at the latest and apply to companies only.

The credit is only available following the conclusion of a separate Solution Provider agreement with T-Systems. This document is for information purposes only and is not a binding offer. If you are interested, we will be happy to send you the relevant contract documents. These also detail the exact content of the services.

The saving will be credited on the first of the month and offset against the actual use of AWS resources and Managed Cloud Services for AWS. The costs are based on the AWS list prices, which are updated daily, for the use of AWS resources and the T-Systems charges calculated on the basis of these for Managed Cloud Services for AWS.

The credit only applies for the use of AWS resources and Managed Cloud Services for AWS Foundation and expires at the end of the month. It is not carried over to the next month. The credit cannot be paid out or offset against other amounts payable by you to Deutsche Telekom.

If you make use of services in excess of the amount of the credit, you will be billed for these based on the AWS list prices, which are updated daily, for the use of AWS resources and the T-Systems charges calculated on the basis of these for Managed Cloud Services for AWS.

If you make use of the services beyond the agreed test phase, the service will extend automatically. The service will then switch to regular operation and the terms and conditions and charges for regular operation apply.

If you would like to terminate use at the end of the test phase, simply send an email to **aws-servicemanagement@t-systems.com**, which must be received by our Service Management team at the above address three days before the required end of the agreement at the latest. Your data will be deleted at the end of the agreement if you have not imported it into another system before the end of the agreement.

High levels of demand may result in delays. Subject to change.

T-Systems is specialized in managing cloud environments like AWS and has been an AWS Advanced Consulting Partner since 2018 with a host of certifications. Over 200 AWS experts are already specially trained in supporting companies in planning, optimizing and using AWS.
