free of charge until 31/10/2020*

Fair
Offer

Start your legacy retirement project now
and spread the consultancy costs. We offer
fair and individual payment terms to suit
your needs.*

Significant
Savings

Move data from obsolete legacy
applications to M.A.R.S and save up to
80% of the cost of running the old system.

How does M.A.R.S. work?

T-Systems Managed Application Retirement Services (M.A.R.S.)
is a consultancy-to-cloud capability for post-productive sunsetting
legacy applications.

We migrate data from any legacy application to our secure,
read-only, platform thereby providing 24/7 global access to
critical corporate memory.

The magic comes in our ability to provide users with familiar
look and feel navigation to view the data they need for whatever
purpose. We call it Historisation.

Now may be the right time to clear the decks of legacy
applications in readiness for accelerated digital innovation.

Get in touch with us now to talk about our offer and
T-Systems unique capability to make legacy history.
