

Managed Application Retirement Services (M.A.R.S.)

The ideal solution for cleaning up IT landscapes

M.A.R.S. is the ideal solution for cleaning up IT landscapes and storing legacy data on a central platform.

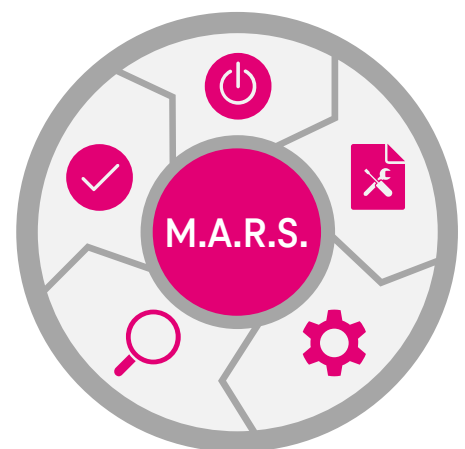

Never before have we seen such diversity and volume of data and its associated systems. Yet data and systems are key success factors for any modern business. Particularly for legacy systems, it's necessary to find a cost-efficient solution that fulfills both business and regulatory requirements.

Store legacy data in the cloud and secure access

M.A.R.S. provides an end-to-end service to historize legacy data from post-productive system landscapes (SAP and non-SAP). 100% of Legacy data is extracted from the application and transferred to the platform. By mimicking the logic of the source system, the service is ensuring targeted access from anywhere and at any time. Historization reduces costs for operation as well as the necessary system and security updates. Your data are stored in an unchangeable, legally secure, and EU-GDPR-compliant manner. The historization is efficient and meets the requirements of the DACH region, such as data storage regulations (GoBD) in Germany, the Code of Obligations in Switzerland, and the Federal Tax Code in Austria.

Advantages of data historization with M.A.R.S.

- Reduction in complexity through centralization and the deactivation of legacy systems
- Up to 80 percent reduction in operating costs possible
- Faster return on investment (ROI) and no investment costs possible
- Operation in the highly secure private or public cloud
- Scalable platform operation
- Low monthly usage fee (minimum term 1 month)
- Needs-based data availability 24/7 or temporary
- Encrypted and secure data transfer via VPN

M.A.R.S. Package 1: Proof of Concept

When to use?		Store data from a post-productive system on a cloud platform. M.A.R.S. historizes data from a legacy system and stores it on a central cloud platform as an end-to-end service in a legally compliant manner .
What is included?		▪ Set up of a M.A.R.S. environment
		▪ Export of structured data from the source system
		▪ Import of structured data into the M.A.R.S. environment
		▪ Generation of up to 10 views*, defined upfront (from standard content)
		▪ Set up of up to 5 users
		▪ 2h online user training for M.A.R.S. application
		▪ Online support for Customer User Acceptance Testing of PoC archive
		▪ M.A.R.S. platform on Open Telekom Cloud will be provided for four weeks after completion of data transfer
What support is provided?		▪ Availability: Monday – Sunday, 24/7
		▪ Service Hours: Monday – Friday; 07:00 – 19:00 respectively
How much does it cost?		▪ One-Time Fee : 10,000 €

* Using views and reports that reflect e.g., transaction codes from the source system the data is made available (Example: SAP Transaction Code 'FS1N/ Balance Display' = Report 'Balance Display')

M.A.R.S. Package 2: Lite Edition/ Platform Operation

When to use?		Legacy systems need to be switched off in order to clean up the IT system landscape, reduce costs and CO2 emissions. However, the data of the legacy applications must be preserved and stored in a central location in compliance with the law.
What is included?		▪ M.A.R.S. Platform with capability to keep data from multiple legacy systems
		▪ All necessary licences to run SaaS
		▪ M.A.R.S. SaaS provided according to Service Description in the appendix
What support is provided?		▪ Availability: Monday – Sunday, 24/7
		▪ Service Hours: Monday – Friday; 07:00 – 19:00 respectively
How much does it cost?		<ul style="list-style-type: none"> ▪ Project Fee: individually calculated, based on source system (not included) ▪ Platform Fee per Application Historised: 750 € / Month After 5th application flat: 3,750 € / Month ▪ Storage Fee per GB (incl. Backup): 0.06 € / Month ▪ Licence Fee per GB: 0.35 € / Month

M.A.R.S. Package 3: Standard Edition/ Platform Operation

When to use?		Legacy systems need to be switched off in order to clean up the IT system landscape, reduce costs and CO2 emissions. However, the data of the legacy applications must be preserved and stored in a central location in compliance with the law.
What is included?		<ul style="list-style-type: none"> ▪ M.A.R.S. Platform with capability to keep data from multiple legacy systems ▪ All necessary licences to run SaaS ▪ M.A.R.S. SaaS provided according to Service Description in the appendix
What support provided?		<ul style="list-style-type: none"> ▪ Availability: Monday – Sunday, 24/7 ▪ Service Hours: Monday – Friday; 07:00 – 19:00 respectively
How much does it cost?		<ul style="list-style-type: none"> ▪ Project Fee: individually calculated, based on source system ▪ Platform Fee: 2,502.59 € / Month ▪ Storage Fee per GB (incl. Backup): 0.06 € / Month ▪ Licence Fee per GB: 0.35 € / Month

Note: A change from 'M.A.R.S. Light' to 'M.A.R.S. Standard' is not possible
