

T-Systems Public Cloud for SAP® Solutions

Test SAP S/4HANA® applications cost-effectively and without risk by choosing your preferred Public Cloud

Just quickly and simply ramp up your resources for better performance, test systems, accelerate projects, and turbocharge your analytics with SAP S/4HANA.

With T-Systems Public Cloud for SAP Solutions, you can use SAP applications flexibly and at any time.

A selection of SAP applications are available as fully functional appliances – complete ready-to-go solutions, not stand-alone components.

Your Benefits

- Rapid provisioning of leading SAP applications
- Fully functional SAP appliances for SAP HANA, SAP S/4HANA, etc. on your preferred public cloud
- Activate/deactivate at any time
- Combinable with Microsoft Azure, Amazon Web Services and Google Cloud
- Outstanding quality and reliability, backed by the latest SAP-certified technology
- Compensation of Jump Start consulting expenses in case of later migration to a productive system
- No additional license costs for up to 90 days

Test SAP S/4HANA® cost-effectively and without risk by choosing from three value-added Jump Start Editions

In order to try out the new opportunities for process optimization and digitization, T-Systems offers latest SAP S/4HANA software on public cloud for test and demonstration purposes and also as a perfect supplement for short-term requirements.

- The **Jump Start Basic Edition** offers prepared SAP application templates, such as SAP S/4HANA 1909. After provision on your supplied public cloud, you can use the system immediately and configure your proof-of-concept. Microsoft Azure, Google Cloud Platform or Amazon Web Services, according to your preferences. During the managed operation phase, available for 90 days, you can evaluate your test system.
- With the **Jump Start Plus Edition** you get a completely pre-configured SAP S/4HANA application, for example the Fully Activated Appliance and benefit from individual consulting packages. The system already contains integrated master and transaction data as a test environment. This allows to try out typical SAP S/4HANA use cases. A common definition of your individual SAP S/4HANA proof-of-concept system, system handover and results workshop included. For questions during the evaluation phase, we support you with "Assistance on Demand".
- In the **Jump Start Full Edition** you also benefit from the integration of an Adobe Document Service System.

Managed Services for SAP Solutions on a Public Cloud including know-how of an experienced and SAP-certified partner.
