

Cyber Security Assessment

Your workshop to evaluate your IT security level holistically

Do you feel secure?

Increasingly professional threats and more complex information security environment pose new challenges for companies.

With Telekom Security's Cyber Security Assessment, you benefit from a workshop which looks at your IT security level and evaluates it holistically. The assessment focuses on various organizational and technical domains. Hereby it considers internal guidelines and policies along with industry-specific legal requirements.

In collaboration with you, we identify vulnerabilities and develop recommendations to cope with them.

As a provider of critical infrastructure, we have expertise of over 25 years of project experience and a profound understanding of the relevant regulations. We support our customers across all industries, from large enterprises to small- and medium sized businesses.

Complex and sophisticated IT security architectures are part of our daily business.

To implement the solution that fits best for you, we develop manufacturer-independent approaches.

The gap analysis and evaluation of your IT security level are based on various industrial requirements, frameworks, and international norms and standards (e.g., NIST, ISO27001, BSI 200-x), along with best practices of the Telekom group.

Assessment – Pre-requisites and Outcome

What does it involve?

- Kickoff (coordinating with participants, finalizing date and location, open questions)
- **One-day workshop** with a Telekom Security Governance expert (interview-based), ideally on-site
- Evaluation of the interview and preparation of the results

What do we provide?

- Analysis of the status quo
- Gap analysis via comparison with a Telekom Security target recommendation
- Specification of identified gaps and recommendation for action as well as a prioritization plan
- Presentation of results

What should you provide?

- Assignment of a primarily responsible member of the customer organization to arrange the workshop
- Employees who know the organization, its technical landscape, and the relevant processes
- Relevant documents in advance

What are your benefits?

- Management summary - the holistic evaluation of IT security
- Gap analysis for you to understand the missing components in your security approach
- Recommendations for action including prioritization plan that helps you reach the desired state.

Cyber Security Assessment Roadmap

Preparation:

- What are the requirements and challenges?
- Are there domains/topics that should be given special consideration?
- Are there already known problem areas?

Execution:

Analysis of the status quo:

- On-site / Web-based interview to determine the current security level in organizational and technical domains
- Assessment of status quo followed by gap analysis

Presentation:

- Creation of the documents
- Presentation of the results (on-site or remote)
- Handover of documents
