

SAP S/4HANA®

transformation in record time

T Systems automates your journey into the world of SAP S/4HANA®, and you gain full transparency in regard to your SAP landscape

T-Systems facilitates digitization with SAP S/4HANA®

Modern processes and innovations create space and competitive advantages. The central topics consist of the move to SAP S/4HANA®, migration to the cloud, and profitable use of growing data volumes.

Switching to SAP S/4HANA® is one of the most complex tasks a company can undertake. There are always different views on a migration.

Have you frequently asked yourself lately:

- Which data should or must be migrated to SAP S/4HANA®?
- How can the system downtime be reduced?
- What about SAP releases, database versions and interfaces?

However, it is evident, that the system downtime should be as low as possible so as not to jeopardize the business. For switching to SAP S/4HANA®, T-Systems has developed the **T-Systems' Data Migration Factory** powered by SNP CrystalBridge®. This transformation approach enables a quick, secure, and smooth switch to a future-ready status throughout the world while regular operation continues.

Your Benefits

Project costs lowered by 32% on average

- Downtimes of your productive SAP system reduced by 73% on average
- Project risk reduced to a minimum
- Optimized hybrid cloud scenarios

Your free of charge CrystalBridge® Assessment is now available

With T-Systems' Data Migration Factory for SAP powered by CrystalBridge®, our experts make use of the Analysis, Shell, and Transformation modules. Through the analysis of systems and organizational structure, a customized transformation strategy can be developed. To reduce system downtime, an empty copy of the source system is created as the initial target system for selective data migration. In addition, transformation rules are defined to carry out migration with maximum speed and efficiency as well as reduced operational interruptions.

Your Assessment results:

- Evaluation and overview of your SAP landscape
- SAP data usage analysis
- SAP S/4HANA® readiness
- Public cloud sizing
- Identification of the most important interfaces

Irrespective of the maturity of your SAP landscape and the cloud solution it needs: T-Systems, as a certified end-to-end service provider and SAP RISE partner, has the necessary experience and foresight to carry out successful migrations. T-systems successfully executes more than 1000 SAP transformations every year.

With our market knowledge and the right partners, we are your one-stop shop and can deliver exactly what you need.

Another important aspect: We have the highest level of automation in the market to carry out the project work remotely.

A free of charge remote systems scan of one SAP System of your choice in the SNP CrystalBridge® Analysis Extractor with Public Cloud Sizing
