The Fine Art of a Fruitful Partnership

T-Systems' SAP Certificates Gallery

We make SAP® solutions happen!

SAP End-to-End, only from T-Systems

As one of the world's leading digital service providers for SAP® end-to-end solutions and services, T-Systems helps enterprises grow in global markets by enhancing the reliability of the entire value chain of the SAP® lifecycle while increasing flexibility.

T-Systems offers integrated solutions for business customers and provides scalable SAP® end-to-end solutions featuring one-stop shopping: from the secure operation of legacy systems and classical IT and Telecommunications services to the transition to cloud-based services and SAP S/4HANA®, and from needs-based infrastructure, platforms, and software to new business models and innovation projects on the Internet of Things.

T-Systems can provide all these thanks to its global reach in fixed-network and mobile communications, its highly secure data centers, a comprehensive cloud ecosystem built around standardized platforms and global partnerships, and the ability to offer top levels of security.

The three-way relationship between the clients, SAP SE and T-Systems is characterized by outstanding efficiency, thanks to close collaboration and the seamless alignment of services, backed by standardized transformation methodologies and scalable and secure infrastructure.

This guide presents the SAP® certifications T-Systems has acquired, what they mean, and what advantages they offer.

We make SAP® solutions happen! SAP End-to-End, only from T-Systems

“

T-Systems has been one of the long-standing partners in the Outsourcing Partner Certification Program. Not only have they been part of the program for 15 years, but they have also been in the forefront of adapting our offerings being the first global provider to be certified on all 8 available SAP certifications for Outsourcing Providers. I would like to thank T-Systems for the trust in the program and look forward to continued collaboration with them.

– Prasad B. Nandagopal
SVP, SAP

Make your digital E2E transformation happen with SAP® solutions provided by T-Systems

Our experts accompany the customers safely into the future by combining T-Systems' infrastructural power with their unbeatable passion.

End-to-End Competence

Comprehensive End-to-End transformation with integrated SAP/Non-SAP solutions featuring one-stop shopping, covering business processes, services, applications & infrastructure

Google Cloud

Microsoft

powered by AWS

Magenta Security

Comprehensive security solutions for industrial networks, which goes beyond SAP applications and secure your cloud native adoption with IOT, ML, AI, Blockchain

Strategic SAP partner

Together with SAP we lay the technical foundation, helping countries to get their economies back on track with seamless and optimized process-management

World's largest SAP Hosting Provider

Managed SAP services from any cloud, with flexible and GDPR compliant hyperscaler integration

Flexible solutions for clients' needs

Experience seamless transition, zero downtime, and uninterrupted daily operations while moving to SAP S/4HANA with SAP-certified transformation methodologies. Proved by over 1,000 SAP projects yearly

A complete digital core sandbox with End-to-End SAP® solutions from T-Systems

Managed Cloud Services

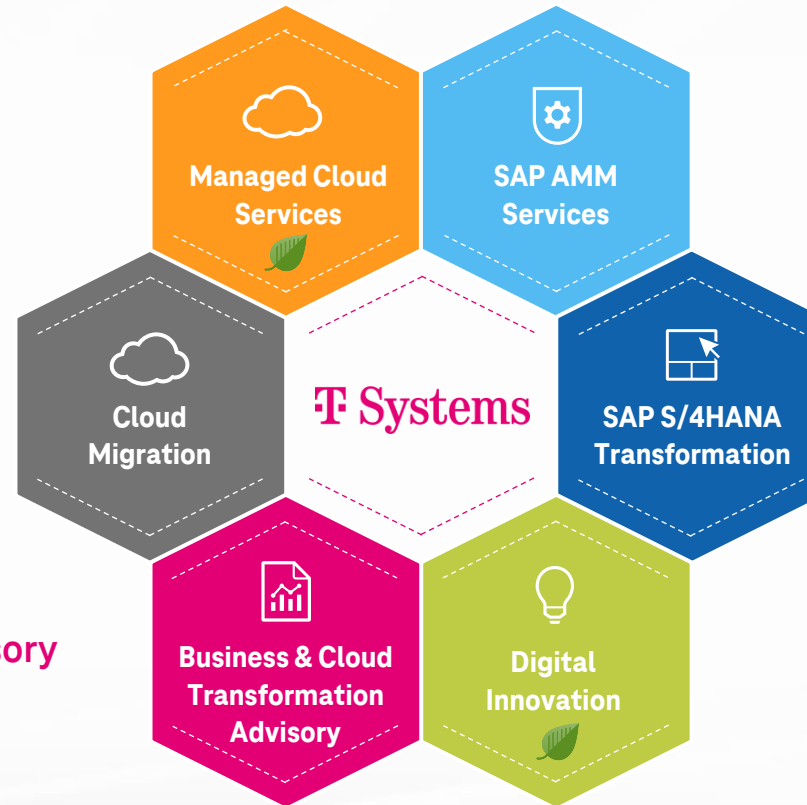

- Proven Managed Services to ensure higher levels of business performance and sustainability
- Focus on multi & hybrid cloud scenarios – one stop shop for e2e coverage & orchestration
- Our heritage for decades

SAP global service partner

As a global strategic service partner of SAP and a leading global consulting company, T-Systems works with SAP to provide clients with a wide range of world-class business consulting and solution implementation services to support SAP technology.

SAP Global Partnership encompasses all countries, continents, industries, technologies and users.

Certification as an SAP Global Partner is one of the highest forms of recognition that SAP can bestow upon a partner. As global partners T-Systems work closely with SAP, both on the development of solutions and the realization of common business objectives, clients reap a host of benefits. For example, they have better and closer contact with SAP, and they have access to the latest and best solutions and methodologies. In a nutshell, they get the most out of their SAP applications.

Solution Distribution

T-Systems works as a reliable consultant and has good knowledge of business needs. T-Systems identifies the best SAP solutions for clients' business challenges and selects the delivery model that best fits their requirements, ensuring that clients receive the greatest possible business value from investments in SAP software when new requirements arise.

Development of Solutions

T-Systems develops solutions, based on the latest SAP platforms. In doing so, cloud solutions, mobile computing, and the Internet of Things are linked together and drive enterprises forward in the digital economy. T-Systems is continuously expanding technology and its functionalities, thereby increasing its performance and relevance for clients. Individual requirements regarding SAP solutions from a diverse range of companies are considered. As a result, that clients can explore innovative ways to manage and expand their business.

Consulting Services

As a service partner, T-Systems plans, develops and implements integrated SAP solutions and realizes the best possible results for companies.

Hosting Solutions

As a long-term SAP partner and the biggest SAP hosting provider in the world, T-Systems is in a unique position to offer concrete advice and solutions about how to stay on top of your business and adopt an operating model that will ensure your business continuity.

SAP partner edge-platinum-partner

SAP Platinum Partners are global companies with which SAP has strategic partnerships.

SAP provider cannot apply for a platinum partnership. It must be awarded by SAP. The award is given after a business case has been reviewed and approved by the SAP Executive Board.

When clients work with a platinum partner, it means they are working with one of SAP's largest and most trusted partners.

SAP® certified in global hosting operations

The data centers operated by T-Systems comply with the standards and criteria required by SAP. Defined operating processes, security standards, monitoring and reporting tools are guaranteed.

Only partners who are involved in complex or very specific hosting or outsourcing projects with SAP software and technology receive the certificate.

T-Systems offers industrialized operation of complex SAP landscapes for globally operating companies in all industries from the private, hybrid and public cloud. Customers benefit from the highest level of SAP expertise.

Automatic capacity provisioning in the cloud leads to significantly lower operating costs than is possible with an on-premise model.

SAP® certified in global SAP HANA® operations

With T-Systems, enterprises can create and implement a digitalization strategy based on SAP HANA®. This enables organizations to tap into countless innovation potentials such as cloud, Internet of Things (IoT), Big Data, real-time analytics, mobility and much more.

With the switch to SAP HANA companies digitize their value chain and make business processes more flexible to continue to be successful in the market tomorrow.

T-Systems offers standardized, industrialized, integrated solutions. Companies can easily get started with SAP HANA® technologies and, for example, use SAP HANA® development environments from a hybrid cloud. With all the advantages of the cloud, e.g. the use of infra-structures without in-house operation and only with use-based costs.

With T-Systems' multi-cloud services, customers can try out SAP HANA without risk.

SAP® certified in global cloud and infrastructure operations

Extended hosting certification for SAP applications that are operated externally in a virtualized manner for companies.

SAP has confirmed, that T-Systems has achieved an exceptionally high level of maturity in terms of security, standardization and automation of operating models, as well as operational integration between cloud services and SAP applications.

For customers, this benefits the provisioning of SAP solutions on different hybrid cloud platforms. In addition, possible critical system conditions and bottlenecks are detected more quickly, and, in the event of an error, a restart is considerably accelerated.

The certifications in this category were awarded the highest level of “Excellent” by the SAP auditors.

Thanks to the proactive and automated modification of systems, customer benefits from highest quality and zero outage.

SAP® certified in global SAP business suite solutions operations

The SAP Business Suite Solutions Operations certification focuses on application management, in particular maintenance, daily operations, and ongoing functional support for business applications for SAP Business Suite.

For SAP users, this creates a powerful basis for scaling and configuring applications according to individual requirements.

Application Management Services from T-Systems ensure that every company can make exactly the adjustments at application level, that are necessary for the successful use of SAP applications.

Thanks to T-Systems' globally available expertise, SAP users all over the world can realize maximum process reliability and maximum efficiency for their application landscapes.

SAP® certified in global SAP S/4HANA solutions operations

The SAP S/4HANA Solutions Operations certification focuses on application management, in particular management of solutions, running on the SAP HANA platform including maintenance, daily operations, and ongoing functional support for SAP S/4HANA.

For SAP users, this creates a powerful basis for scaling and configuring applications according to individual requirements.

Application Management Services from T-Systems ensure that every company can make exactly the adjustments at application level, that are necessary for the successful use of SAP applications.

T-Systems helps customers in SAP S/4HANA Solutions Operations with extensive functional SAP application skills and globally available expertise.

SAP® certified in global SAP SuccessFactors solutions operations

With the certification “SAP® Certified in SAP SuccessFactors Solutions Operations”, T-Systems supports customers in the implementation, use, and adaptation of an integrated end-to-end human resources management system.

With the certification, T-Systems ensures future-oriented and modern human resources management, which can be implemented according to individual requirements.

Thanks to the globally available expertise of T-Systems, SAP users all over the world can realize maximum process reliability and the highest efficiency for their HR Management System.

SAP® certified in global DevOps

At present, knowledge and know-how on the international market vary greatly, when it comes to implementing the DevOps process methodology. This fact was a central argument for SAP, to establish this certificate as a reference for providers to expand their DevOps capacities.

The DevOps certification creates a link between technical provision and application management. It is not targeting a specific application but is comprehensive and method-oriented.

With the “SAP® Certified in DevOps” label, T-Systems demonstrates that a high level has been achieved, about implementing efficient processes for the integration of design, development, and operations – i.e., system development and operations.

T-Systems is working according to the DevOps principles of flow, feedback, and continuous learning, with a focus on cloud solutions and cloud extensions.

SAP® certified in global BTP operations

Already today, many of the world's largest companies are SAP S/4HANA customers, laying the foundation for a comprehensive business transformation. The goal: personalize business processes, accelerate projects or drive innovation.

The SAP BTP is intended to create a uniform environment for efficient data use and analysis, artificial intelligence, application development, automation, and integration.

For SAP, cooperation with T-Systems is obvious for such pilot certifications: The Bonn-based company has been a certified outsourcing partner for more than 20 years. The SAP BTP certification pilot project, for which SAP has brought T-Systems on board, shows what exactly such cooperation looks like in practice.

In advance, T- Systems has compiled numerous feasibility studies, analyses and a wide range of showcases on SAP BTP.

SAP outsourcing operations partner guide benchmark (Excerpt)

| | Application | | | Platform | | | Cross Certification | |
