MEDIS+

## Next generation Managed EDI Services

Business Critical Data processing empowered by
SEEBURGER Business Integration Suite

- EDI (**Electronic Data Interchange**) is the fully automated data exchange of largely business critical data using standardized message formats and communication protocols

- EDI is continuously gaining importance however operation becomes more and more complex

- Numerous industry-specific B2B processes must be traceable, automatically monitored and digitally mapped

- The SEEBURGER B2B/EDI Full Service offers secure transfer of high-quality data as an all-round carefree package in the cloud

MEDIS+ represents a quantum leap in **EDI** landscape **modernization** in combining **cutting-edge cloud technology** with **best-of-breed business integration software**

T **· ·Systems·** Let's power higher performance

SEEBURGER Business Integration

🎯 The Challenge

Decelerated modernization and **migration** of IT legacy systems limit the ability to benefit from the implementation of a new enterprise IT strategy

Partner **onboarding** takes months to establish enterprise-grade business communication and cross-company workflow

Expensive further development for EDI legacy system slows down process automation and innovation

💡 The Solution

- **Industry Cloud E2E service** - software and process expertise by SEEBURGER, systems integration and private cloud services by T-Systems

- **Complete B2B/EDI library** - over 20,000 preconfigured, industry-specific business partner mappings

- **Redundant, fail-safe operation in twin-core data center** - best-of breed private cloud solutions by combining Oracle Private Cloud Appliance and Private Cloud Infrastructure

- **Unmatched performance** - ten-figure transactions per day, up to 99.9% of JIX messages processed within 30 seconds, 99.99% within 60 minutes

- **Established network** - extended EDI ecosystem of hundreds of production and assembly plants connected together with more than 50,000 suppliers and business partners

- **Self-service capabilities** - intuitive UI and powerful automation

- **Operation** - available worldwide, service can be tailored to fit client needs, providing customized SLAs and specified Service Delivery and Operations managers as an option.

🤝 The Benefit

- **Innovation** - state-of-the-art solution, early adoption of new features focusing on continuous streamlining and standardization of industry processes and formats

- **Reliability** - global 24x7 availability, support, and delivery model based on T-Systems' Zero Outage principle

- **Versatility** - multi-tenant capability, interconnecting a large variety of multi-industry companies, integrated into a fully-managed EDI business solution

- **Transparency** - real-time monitoring, reporting and alerting features support and improve business decisions

- **Scalability** - our top-notch cloud infrastructure comes with multiple subscription and flat-rate models

- **Cost-effective** - up to 30% of cost saving potential, when compared to in-house self-maintained EDI solutions

- **Expertise** - Business critical JIX Process Support and Supervision jointly delivered by the best of T-Systems engineering and valued SEEBURGER consultants

- **Security and Compliance** - Meet guidelines, laws, and requirements for applications and infrastructure with a cutting-edge cloud technology that enables security standards through IT security management

- **Low-risk and fast Migration** - automated self-services for compliance checks and partner onboarding as well as the SEEBURGER Business Integration Suite can accelerate the transformation essentially
