

Let your business rise!

T-Systems is a premium supplier for RISE with SAP. With us by your side, your SAP transformation becomes faster and more successful.

Our world is changing faster and faster. To keep pace, companies have to increasingly rely on digital innovations. A major key to future business success lies in the cloud. It provides greater flexibility, simplifying process adaptation and enables companies to swiftly adjust to new requirements. For example, they can respond quickly to changes in demand and thereby increase customer and employee satisfaction. Furthermore, cloud solutions allow companies to access “intelligent” solutions while reducing operational costs.

RISE with SAP streamlines the introduction of SAP S/4HANA and supports your cloud journey with a broad offering for transformation as a service. This takes the digitalization of your company to the next level. You can adopt new data-driven business models and innovations, enhance processes resiliency, and equip your business optimally for the future.

Since January 2024, we have been supporting companies such as Deutsche Telekom in their cloud journey as a global premium supplier for RISE with SAP.

RISE with SAP: Transformation made easy

With RISE with SAP, you can transfer your current ERP data and processes to the cloud with less risk and without compromise. The package of customized ERP software, transformation services, business analytics, and T-Systems' partner expertise enables a seamless transition to the cloud and supports your individual cloud journey.

Why RISE with SAP from T-Systems?

What's behind the offer: SAP serves as your contractual partner for the RISE with SAP subscription, providing software and support as a service. T-Systems offers efficient, secure operation and the infrastructure for SAP S/4HANA – tailored to your specific needs, even for intricate and hybrid SAP or non-SAP environments.

We offer end-to-end SAP services on the T-Systems private cloud platform and public cloud, including hyperscalers. Our approach is to collaborate with the customer to identify the most effective way to implement RISE with SAP.

Through individual consulting sessions, assessments, and with special migration and transformation tools, we accelerate the adoption of SAP S/4HANA. This empowers our customers' transformation to an intelligent, sustainable enterprise based on SAP S/4HANA.

“Digitalization, globalization, sustainability – companies that can quickly adapt their business processes to new challenges are ahead of the competition. T-Systems and ‘RISE with SAP’ provide organizations with exactly this flexibility.”

Ferri Abolhassan, CEO, T-Systems

Start your individual RISE with SAP journey

As an end-to-end SAP services provider, we deliver numerous added values for your business. Our broad offering of managed services and transformation and application management services can reduce complexity, mitigate risks, and lower costs for our customers. Maximum security, reliability, and stringent data protection are always included.

Being a Premium Supplier for RISE with SAP adds a new dimension to our services. T-Systems provides a powerful, sophisticated private cloud for RISE with SAP in Germany (with other countries to follow) that complies with the highest regulatory standards – for example, the requirements of the GDPR, BaFin, or security services. We are proud about our 20+ years of experience in compliance and SAP and non-SAP operations. T-Systems' private cloud is the perfect starting point for your individual RISE with SAP journey.

T-Systems: Your strong, trusted partner for RISE with SAP

Here are the benefits our services bring to your business:

- E2E services for RISE with SAP: SAP S/4HANA from a single source by T-Systems
- Efficient operation, secure infrastructure tailored to your individual needs
- Flexible choice of platform - powerful, mature private cloud in a T-Systems data center or public cloud
- A wide range of E2E SAP services, including SAP S/4HANA transformation, Application Operations (AO), Application Management & Modernization (AMM), Systems Integration (SI), and innovative solutions for AI and sustainability
- More than 20 years of experience in operating large, complex, and critical SAP landscapes for customers worldwide with zero outage quality
