

# AI based Law Monitor\*

Automate the tracking and identification of relevant changes with AI.

\*Adjustable to other use cases (e.g.: IPs, norm and standard monitoring, etc.)

\*Disclaimer - Image for illustration only. This dynamic solution keeps getting updated as per new requirements.

## Seamlessly navigate legislative updates with ease to boost your workflow.

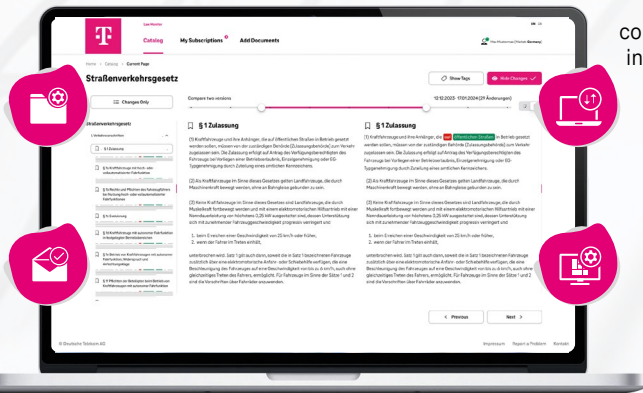

The AI based Law Monitor automates the process of regularly checking sources of legislation and identifying the key relevant changes vs. previous versions.

- Automatically monitor sources and get informed when changes and amendments are made
- Automatic comparison and highlighting of relevant differences
- Supports different formats: images, tables, text.
- Store and manage legislation texts

<b>What is in it for me?</b>		Significantly automates and optimizes the process that is still manual in several instances.
<b>What is included?</b>		The solution is offered as a SaaS tool with standardized functions which can be further customized with additional functions as per the client needs.
<b>What is the price?</b>		Depends on the specific project needs.

### Store and Manage Legislation Texts

Self-Service application to save legislation documents including tables and images. Currently supporting legislations from 20+ political entities and languages.

### Stay Ahead with Real-Time Legislative Updates

Automated monitoring of government sources for the latest amendments and instant alerts on new versions of tracked legislation.

### Intuitive Legal Change Tracking

Experience effortless tracking and comparison of legislative documents in a user-friendly interface. Instantly highlight differences, providing quick, at-a-glance assessments between new and previous versions for streamlined analysis.

### Certified, Multi-Tenant SaaS Application

PSA-certified SaaS app on GCP caters to multiple tenants with Single Sign-On and offers a robust API for seamless integration and enhanced functionality.

### Benefits

- Reduce costs and increase productivity through real-time updates, relevant change detection and more functions.
- Significantly speed up the implementation of regulation changes in your product development and organization.
