# Pathfinder

## GenAI POC on AWS
## by T-Systems

**Leverage our extensive expertise and first-hand knowledge on AWS and take your first steps into the GenAI universe with Pathfinder! This POC is designed to accompany you on your way into the next era of computing, an era supported and rethought by the capabilities of GenAI. Explore, assess, and analyze your data from a completely new perspective using the cutting-edge technology provided by the industry leader AWS.**

**Take your first steps in a secure environment accompanied by T-Systems, AWS Premier Partner and data security specialist. Let us discover what new path GenAI can open for you.**

Never has the adoption of new technologies been as fast as today. Generative AI and its capabilities open new horizons and new use cases. AWS offers a multitude of tools enabling customers to take their first steps towards the adoption of GenAI. Yet, companies are slower to adopt AI due to the complexity of environments, unclear ownership, data privacy and data residency.

Our POC Pathfinder allows customers to explore GenAI capabilities on AWS. Customers get access to pretrained foundation models and will be accompanied by certified AWS specialists to assess integration possibilities of GenAI into their current setups. T-Systems provides the end-to-end setup to artificial intelligence (AI) and machine learning (ML) services with a user-friendly interface through which customers' own data can be uploaded.

## What we offer

- Secure playground for exploring GenAI capabilities on AWS with own data sources based on data residency rules and preventive guardrails.
- Learn and understand the AWS services for GenAI in a condensed and success-oriented way
- Leverage the capabilities of GenAI without substantial investments into LLMs
- Use pre-trained Foundation Models to chat with your data
- Leverage implementation of Amazon Kendra / AWS Lambda / Amazon Bedrock / Amazon SageMaker / Amazon S3

## Why T-Systems?

As an AWS Premier Partner, not only do we offer consulting in specialized fields, but we also partner with AWS in developing new use cases, services and help our customers in adopting new technologies.

With our POC Pathfinder, we offer you a unique possibility to define implementation scenarios for generative AI within your environment and take your first steps without substantial investments in AI model training or building. Take your first steps towards GenAI with us.

**Abbreviation:**
- POC: Proof of Concept
- AI: Artificial Intelligence
- ML: Machine Learning
- LLM: Large Language Model

## Pathfinder GenAI POC on AWS by T-Systems

| | | |
|---|---|---|
| **When to use?** | ▶ | Take your first steps in the field of generative AI on AWS |
| **What is included?** | | · Access to pre-trained AI/ML services on AWS <br> · Upload of customer own data for POC <br> · Hands-on data chats, analysis and use case identification <br><br> · Secured environment <br> · User-friendly interface |
| **What support is provided?** | | Complete end-to-end setup to AI/ML services on AWS and guidance by AWS Premier Partner |
| **How much does it cost?** | € | € 1,499 euros for a POC period of two weeks  (one-time fee*) |

## Information & Conditions

· *All prices are exclusive of VAT and any travel expenses and will be charged as applicable

· This document is for information purposes only and does not constitute a binding offer. If you are interested, we will be happy to send you the relevant contract documents. These also list the exact contents of the service and the specific conditions
