

MEDIS+

Enterprise Data Integration Service – end-to-end transport and integration of critical production data

- With **MEDIS+**, T-Systems provides a sophisticated and proven system for structured communication between any type of IT systems
- Automated B2B processes for business-critical data
- A highly available platform for worldwide data exchange and integration of data is, for example, provided in the automotive industry – between the manufacturers, their suppliers and other partners
- Through seamless global communication, the manufacturing and delivery processes can be perfectly integrated worldwide
- The client and provider capability of **MEDIS+** ensures a broad range of data transformations and communication protocols
- For security and availability reasons, the platform is distributed among several data centers. Quality features include high availability of 99.98 % and 24/7 support
- No high pre-investments are necessary (hardware, software, management) due to a fully managed service
- Clearly defined responsibility through dedicated contact persons

**HIGH FLEXIBILITY AND EXTREME RELIABILITY
MAKE PRODUCTION PROCESSES EFFICIENT**

TRENDS & DRIVERS

Efficiency enhancement

- MEDIS+ enables customers to handle their electronic data exchange around the world, 24/7, with maximum availability and security.

CUSTOMER NEEDS

Worldwide EDI services

- On a central High Availability Disaster Recovery (HA/DR) capable platform, EDI services for Mercedes-Benz Group AG are made available worldwide.
